

# UNITED STATES K47

The USA still fields enormous numbers of traditional infantry forces and conventional armoured vehicles yet few factions have embraced the military and industrial benefits of Rift energy as effectively as Uncle Sam. US factories and advanced Rift research facilities pour out a seemingly inexhaustible supply of advanced military equipment. The United States' industry works tirelessly to fuel an unparalleled war machine in an ongoing crusade to cleanse the Earth of the Axis' evil.

Repelled by the static meat grinder campaigns of 1945 and 1946, the US Military has embraced mobility on the battlefield. Fast-moving US forces specialise in striking where the enemy least expects.

In combat the US Jump Infantry, the 'Fireflies', harness Rift technology to dart around the battlefield whilst US-designed walkers such as the Coyote and Grizzly storm the frontlines. Some examples benefit from the addition of gravity repulsor jump pods allowing them to keep up with the Fireflies and provide much needed heavy support. Few enemy positions can resist the impact of a fully integrated airborne assault.

On the ground breakthrough formations of GIs and Marines are equipped with heavy powered armour suits; these not only provide ballistic protection but also allow excellent mobility through their artificial musculature. The Los Alamos Rift has also given the USA access to directed energy weapons of great destructive power and, of all the combatants the US has the greatest capacity to field such weapons en masse. The brainchild behind them is the eccentric but brilliant Nikola Tesla. These weapons range from the man-portable heavy Tesla rifle to vehicle and walker-mounted

Tesla cannon, nicknamed 'death rays', as per Tesla's blueprints. Though indelicate, the name is apt; few things are more terrifying to an enemy force than the barrage of blinding blue actinic Tesla bolts that precede an attack by US forces. Over 1945-46, many of these weapons were also supplied to their Commonwealth Allies under the Lend-Lease programme.

Harnessing the potential of Rift biological engineering, the USA has also created the Paragon enhanced soldier program. These genetically modified men and women are gifted with enhanced physical and psychic traits whilst still retaining their original personalities and humanity. Deployed primarily in special forces teams, these troops are key to countering the horrors that the Axis are unleashing on the battlefield.

Armed with this 'arsenal of democracy', and buoyed by the miracle of Los Alamos, the United States are determined to bring the wrath of divine retribution on their enemies. On the surface, the people of the United States are unified in their mission; to wipe the scourge of Axis abominations from the face of Europe, to remove the threat of surging communism, and deal deliverance to the Empire of Japan.

Meanwhile, Roosevelt increasingly regards the British Commonwealth with callous eyes, wary of the new technologies that their Rift-tech research has created, only possible through the US' generosity in sharing certain findings from the Los Alamos Rift. The British failure to reciprocate places the Allied relationship in jeopardy.

Only one nation – that under God – can triumph at the end of days.

# THE ARMY LIST

---

This army list describes the troops, equipment, and special abilities available to the United States in games of *Konflikt '47*. It may be used in conjunction with the Force Selection rules on pages 164-171 of the *Konflikt '47* Rulebook. Each unit entry specifies its type for the purposes of fulfilling the slots in each type of Platoon.

## Incorporating Bolt Action Units

If both players agree, they may use units taken from *Bolt Action Armies of the United States: Third Edition* in

their list (see page 164 of the *Konflikt '47* rulebook). It is recommended that any units taken be identified as 'Late War' units in *Armies of the United States*. Any Infantry units count as Basic Infantry for the purposes of the *Konflikt '47* Platoon Selectors.

With the opening of the Rifts, the nature of warfare has changed. For this reason, any *Bolt Action* units taken do not benefit from the United States Army Special Rules, nor do they benefit from the Army Special Rules present in *Armies of the United States*.

## ARMY SPECIAL RULES

---

### THE ARSENAL OF DEMOCRACY

*With the awesome power of American industry backing them the US Military has continued to emphasise aggressive offense and coordinated assaults. Soldiers use the high rate of fire of their weapons to suppress and overwhelm opponents in the field.*

United States units firing any weapon that has multiple Shots may re-roll one failed 'to hit' roll per weapon type. For instance, a unit of six Fireflies all equipped with M1X1 Thompsons firing twelve shots in Normal Mode would be able to re-roll one die. Whereas a Linebacker Jump Walker firing with Twin HMGs and an M21 Light Tesla Cannon using the Tesla Arc ability would be able to re-roll to hit with one HMG die, and one M21 Light Tesla Cannon die.

### DEATH FROM ABOVE

*The United States has pushed the development of Rift-tech-derived repulsorlift technology further than any other nation. The Firefly divisions are the backbone of US forces in Europe, operating in a massed drop assault role, supported by ever more capable jump walkers. The co-ordination of US Airborne forces is second to none.*

Infantry units do not suffer the usual -1 Morale Penalty for moving onto the table from Reserve when using the Flight special rule. United States Vehicle units do not suffer the usual -1 Morale Penalty for moving onto the table from Reserve when using the Jump special rule.

### TOUGH AS NAILS

*Roosevelt's remarkable recovery at Los Alamos has sparked an unyielding patriotism in the common man of the United States. This has extended to the soldiers of the US Military, spurring them to ever greater feats of battlefield valour.*

All United States Platoon and Company Commanders start the game with an additional point of Guts. Units from the Heroes section of the Army List do not benefit from this special rule.

### TESLA'S GIFT

*With the United States' vast industrial capacity, Tesla's 'death rays' are now mass-produced, coupled with ever more reliable power-plants.*

When a Rift Die is drawn from the Dice Bag, rolled, and assigned to a unit armed with any weapon with the Tesla Arc special rule, including because that unit has been assigned an Order Die and does not already have a Rift Die, you may re-roll the result.

# HEROES

## SLAMMER SAMUELS

Enlisting the day after Pearl Harbor, Harris Samuels quickly established himself as a natural soldier and leader. Having impressed his drill sergeants and coming to the notice of several influential officers, Samuels was fast-tracked to the fledgling 1st Ranger Battalion and was one of fifty specially selected Rangers dispersed amongst the British Commandos for the Dieppe Raid in August 1942. In this action he became one of the first American soldiers to see ground combat in the European theatre.

Winning the Silver Star for single-handedly taking out a German Tiger Tank in Tunisia, Samuels was later promoted to the rank of captain just prior to the D-Day invasion. Badly wounded on Omaha beach he was transferred back to the USA for treatment. Rather than being sent to a standard hospital, Samuels found himself in a special facility at Area 51 in New Mexico. Here he was offered the opportunity to volunteer for the newly instigated Paragon programme.

Readily accepting the challenge he passed the intensive physical and mental entry tests easily. The programme's genetic enhancement procedures worked flawlessly and Samuels became a benchmark for the Paragon soldier initiative. He quickly adapted to the prototype Rift-tech weaponry provided to him, so much so that he was issued with the first experimental heavy Tesla rifle which he insisted on field testing back on the European mainland. In combat Samuels revels in close quarters fighting where he puts his signature weapon, the Tesla Gauntlet, to good use. Combining a pneumatic punch with a Tesla discharge, the glove allows him to takedown even armoured or inhuman opponents he faces.

'Slammer' Samuels is a truly inspiring giant of a man, leading from the front and getting those around him to live up to standards he sets. He is a true all-American hero.

## ROBERTA "EINSTEIN" WELLS (SCIENTIFIC ADVISOR, 1945)

A graduate in physics, the emergence of the Los Alamos Rift at the Trinity test site led to Roberta dedicating herself to the study of Rift Energy. The deployment of Axis Rift horrors, in particular the dread Totenkörps, in late 1944, led to her volunteering to ship out to the European theatre to conduct studies of the application of Rift-tech in warfare. Despite numerous objections from the US Army, her request was eventually granted.

Her no-nonsense approach, resilience to the psychological horrors of the Rift War, and willingness to get stuck in marked her out amongst the raft of scientific advisors seconded to the front. Exhibiting a fierce independence, Roberta would often strike out separately from the squad to which she was attached, lest they constrain her in the pursuit of her studies. Nevertheless, she gradually earned the respect of the US Army soldiers entrusted with her safety in the field, having displayed a remarkable aptitude for combat situations.

During this time, she carried an array of equipment of her own design, including a highly modified Assault Rifle, enabling her to detect, analyse, and where circumstances allow, collect pockets of Rift energy.

## OFFICERS

Six years of intense warfare has created many excellent officers in the US armed forces but, it has also ended the lives of too many. New cadres of officers pass through the War Colleges and Academies at a phenomenal rate, often entering combat within months of graduating. This means that a wide range of quality can be seen in the officer corps on the frontlines ranging from 6-year veterans to wet-behind-the-ears graduates.

# MEDICS

The field medic presents the wounded soldier with his best chance of surviving serious injury and can ensure that lightly wounded soldiers are returned to fighting fitness as rapidly as possible. Under the old Geneva Convention medical staff were obliged to go unarmed, but now that unnatural horrors roam the battlefields they now carry Pistols as a bare minimum, and are often accompanied by more heavily armed guardians.

## RIFLE SQUAD

Not all US infantry and Marines have been provided with powered armour and these troops are now classed as rifle squads to differentiate them from their armoured comrades. However, many rifle squads are now receiving the new M3 assault rifle giving these troops a significant punch.

## US HEAVY INFANTRY SQUAD

Although Axis 'Schwer' heavy powered armoured infantry appeared on the battlefields first, the USA was not far behind in equipping their specialised assault troops with their own personal armoured suits. Armoured infantry squads generally carry the arm-mounted M1945SB .30 Cal LMG which can lay down a formidable weight of fire.

## FIREFLY AIRBORNE SQUAD

Rift technology has allowed the creation of gravity nullifying jump packs to re-equip the USA's elite paratrooper formations, starting with the famous 82nd and 101st Airborne Divisions. Exploiting the pack's capabilities to perform assault drops and short-range jumps, the Fireflies specialise in rapid advances to outmanoeuvre and outflank enemy forces. Once in combat they use their signature weapon, the formidable Thompson M1X1/2 to hold their ground until friendly infantry and armour can relieve them.

## PARACADUTISTI FIREFLY AIRBORNE SQUAD

In the early days of the Firefly programme, the US provided equipment and training to the Esercito Cobelligerante Italiano, with the goal that each of their parachute battalions would be able to deploy at least one company by jump pack rather than parachute. The ability to enhance the mobility of these elite troops, without being reliant on aircraft, allowed the Paracadutisti to get to the thick of the fighting in quick order. With the cessation of the Lend-Lease program and each nation now guarding its technological secrets ever more closely, the Fireflies of the Paracadutisti remain reliant on more conventional firearms than their American cousins.

## PARAGON SQUAD

Paragons are the elite of the United States fighting troops. Recruited from all branches of the military these men and women have their physical and mental attributes enhanced by carefully measured and targeted exposure to Rift Energy at Area 51. The Rift effects on the Paragons are mostly benign, avoiding such extreme measures that create the Rift mutated Axis horrors. In action they usually operate in small teams performing hit and run attacks intended to disrupt Axis forces. Equipped with the best warfighting technology that the United States can provide, Paragons are a welcome sight to the rank and file US fighting soldier, and are at the forefront of the American media's portrayal of the 'victory' in Europe. However, their almost superhuman attributes can make some ordinary, god-fearing soldiers uneasy.

Unit Composition: 1 Paragon NCO and 2 Paragons

# INFANTRY TEAMS

## MACHINE GUN TEAMS

Despite the arrival of rift-based technology on the battlefield, great reliance is still placed on the simple mechanics and versatility of the machine gun in the support role. US forces still regularly employ the reliable .30 cal medium and .50 cal heavy machine gun in all theatres.

MMG TEAM				REQUISITION POINTS	
Team Composition:	3 Soldiers			Inexperienced:	35
Unit Type:	Machine Gun Team			Regular:	50
Base Size:	25mm			Veteran:	65

Morale Value:	8	9	10		

# ANTI-TANK TEAMS

Squads requiring offensive firepower against walkers and tanks still rely on the punch of the trusty Bazooka. However, recent deployments of even more heavily armoured opponents has made the weapon less effective and a light version of the M20 Super Bazooka has begun to be rolled out. Heavy Bazooka teams have also been incorporated into powered armour infantry formations.

BAZOOKA TEAM				REQUISITION POINTS

# SNIPER TEAMS

Now that many of their targets are protected by advanced armour, or enhanced by genetic manipulation. US Snipers have a new challenge on their hands. Only those with pinpoint accuracy and tireless patience are able to fell such targets, so only the very best marksmen make the grade.

SNIPER TEAM			REQUISITION POINTS

• Replace the Assistant's Pistol with an Assault Rifle			+7	

# LIGHT MORTAR / MORTAR TEAMS

While Rift weapons of the Tesla variety have provided US forces with excellent direct fire capabilities, indirect fire is still provided by tube mortar weapons firing high explosive projectiles. US Forces deploy the 60mm light mortar, 81mm medium mortar, and 107mm heavy mortar.

LIGHT MORTAR TEAM				REQUISITION POINTS
Team Composition:	3 Soldiers			Inexperienced: 25

## FLAMETHROWER TEAMS

The merits of the portable-flamethrower have not diminished even with the proliferation of Rift-derived weaponry. In fact, there are few greater deterrents to Rift-enhanced Axis and Soviet monstrosities than a timely gout of flame.

FLAMETHROWER TEAM			REQUISITION POINTS	
Team Composition:	2 Soldiers		Regular:	50

Damage Value:	4+	5+		
Morale Value:	9	10		

# ARTILLERY

## FIELD ARTILLERY

Long range indirect firepower continues to be provided by traditional howitzers whilst Rift-tech replacements remain on the drawing board. US forces are plentifully supplied with light, medium, and heavy examples which are deadly to both human and non-human adversaries.

LIGHT ARTILLERY TEAM				REQUISITION POINTS

## ANTI-TANK GUNS

The M17 Tesla cannon provides enhanced anti-armour capability to US troops. It's so effective that their operators regard the overloaded electric blue lightning beams as 'Death Rays'. However, until these weapons, and other devastating designs, become more widely available, many formations still rely on conventional 76mm and 90mm anti-tank guns to take out armoured opponents.

# WALKERS

## M3A2 PONDSKATER SCOUT WALKER

Having suffered at the hands of German and Soviet fast recce walkers, the US looked to develop a lightweight scout walker that could operate in highly difficult terrain and provide a vehicle more versatile than the M8 armoured car. The Ponds kater was originally developed by the US Marine Corps but was quickly brought into Army service once it had passed initial field trials. Light enough to be carried by a glider or parachute, and small enough to deploy from an infantry landing craft, the Ponds kater acts as a recce vehicle for the US Army and Marines.

Unit Type:	Scout Walker (2 Legs)	
Standard Weapons:	1x Pintle-mounted HMG with a 360-degree arc of fire 1x Forward-facing, Hull-mounted MMG	
Movement Rate:	<i>Advance</i> Up to 12"	<i>Run</i> 12"–24"
Damage Value:	7+	
Quality:	<i>Regular</i>	<i>Veteran</i>
Morale Value:	9	10

### REQUISITION POINTS

Regular: 80

Veteran: 96

### SPECIAL RULES

- Amphibious
- Open-topped
- Recce
- Two-legged

### OPTIONS

Points

- Add a second HMG on the same Pintle mount +20

## M3A5 PONDSKATER SCOUT WALKER

While the Ponds kater fulfilled immediate needs for a dependable recce walker, the remote, isolated battlefields of the South Pacific showed the need for a mobile support weapon platform. The USMC settled for mounting a M20 Recoilless Rifle to replace the pintle .50 cal HMG, a variant that soon found its way into Army hands as the M3A5.

Unit Type:	Scout Walker (2 Legs)	
Standard Weapons:	1x Forward-facing Light Anti-tank Gun 1x Forward-facing, Hull-mounted MMG	
Movement Rate:	<i>Advance</i> Up to 12"	<i>Run</i> 12"–24"
Damage Value:	7+	
Quality:	<i>Regular</i>	<i>Veteran</i>
Morale Value:	9	10

### REQUISITION POINTS

Regular: 110

Veteran: 132

### SPECIAL RULES

- Amphibious
- Improved HE – Instead of HE (1"), the Light Anti-Tank Gun has HE (2").
- Open-topped
- Two-legged

## MSA2 COYOTE LIGHT WALKER

Introduced in late 1946 and carrying a single crew member, the Coyote has served with distinction in all theatres and environments. Although lightly armed it is manoeuvrable, mechanically reliable, and has proven useful in the reconnaissance role and in supporting the infantry in urban battlefields. The one criticism is that the workload of the single crew member makes it difficult to use all the weapons simultaneously.

Unit Type:	Light Walker (2 Legs)		<b>REQUISITION POINTS</b>
Standard Weapons:	Left Arm		Regular: 105
	Right Arm mounting an MMG (Arm-mounted MMGs do not halve their Shots value for being mounted on a Vehicle)		Veteran: 126
	1x Forward-facing HMG		
Movement Rate:	<b>Advance</b> Up to 12"	<b>Run</b> 12"–24"	
Damage Value:	8+		
Quality:	<b>Regular</b>	<b>Veteran</b>	
Morale Value:	9	10	
<b>SPECIAL RULES</b>			
• Single-crew Walker			
• Two-legged			

## MSA6 JACKAL LIGHT JUMP WALKER

The Jackal variant of the original Coyote uses new Rift-tech repulsor pods to give this walker a jump capability similar to that of Firefly infantry, allowing combined arms jump assaults. The Jackal sacrifices firepower for speed but can be fitted with an arm-mounted flamethrower to compensate.

Unit Type:	Light Walker (2 Legs)		<b>REQUISITION POINTS</b>
Standard Weapons:	Left Arm		Regular: 105
	Right Arm mounting an MMG (Arm-mounted MMGs do not halve their Shots value for being mounted on a Vehicle)		Veteran: 126

Morale Value:	9	10	
<b>SPECIAL RULES</b>			
• Jump			
• Single-crew Walker			
• Two-legged			
<b>OPTIONS</b>		<b>Points</b>	
• Add an Infantry Flamethrower, mounted to the Left Arm		+30	

## M2A1 MUDSKIPPER JUMP WALKER

Buoyed by the success of the jump-capable Jackal, the US military demanded a heavier platform to give the Fireflies some genuine punch and support them as they jumped into enemy territory. The response was the Mudskipper, Its repulsor pods and potent weapons loadouts have proved to be a battle-winning addition to the jump battalions. The Mudskipper also embodies a very effective Anti-aircraft capability with its arm-mounted HMGs. The M2A2 Hunter variant loses that capability but replaces the arm-mounted .50 cal's with Bazooka rocket launchers for additional anti-armour firepower.

Unit Type:	Medium Walker (2 Legs)		<div>REQUISITION POINTS</div> <div>Regular: 290</div> <div>Veteran: 348</div>
Standard Weapons:	Left and Right Arms each mounting an HMG ( <i>Arm-mounted HMGs do not halve their Shots value for being mounted on a Vehicle</i> ) 2 x Forward-facing Light Automatic Cannons ( <i>Must be fired at the same target</i> ) 1 x Forward-facing, Hull-mounted MMG		
Movement Rate:	<i>Advance</i> Up to 12"	<i>Run</i> 12"–24"	
Damage Value:	9+		
Quality:	<i>Regular</i>	<i>Veteran</i>	
Morale Value:	9	10

• Replace Arm-mounted HMG with Arm-mounted Bazooka		+5 each	

## M2A5 LINEBACKER JUMP WALKER

Following the disastrous drop assault on Collegno in 1946, the limitations of the original M2 Mudskipper series became clear. While a perfectly satisfactory design, the Firefly jump infantry were in need of more versatile fire support when they dropped into combat. American designers developed an extensive series of refits for the Mudskipper to increase its tactical flexibility. An M21 Tesla cannon and innovative new universal mounts for secondary weapons enabled the walker to be quickly configured to face a wide variety of threats, more articulated legs and feet were much more resilient to the pressures of high-impact landings, and a new control system enabled it to be piloted by a single crewman without loss of utility. The new variant was dubbed the M2A5, and officially considered a continuation of the Mudskipper line rather than a distinct vehicle, but crews and Firefly troopers alike quickly dubbed it the 'Linebacker'. The combat debut of the new model came in May 1947 when 200 Linebackers were rushed to the front line to help breach Axis lines during the siege of Stuttgart during Operation Valentine.

<b>Unit Type:</b>		Medium Walker (2 Legs)	<b>REQUISITION POINTS</b> <b>Regular:</b> 328 <b>Veteran:</b> 394
<b>Standard Weapons:</b>		1x Arm mounting an M21 Light Tesla Cannon 1x Arm mounting Twin HMGs ( <i>Arm-mounted HMGs do not halve their Shots value for being mounted on a Vehicle</i> ) Forward-facing, Hull-mounted Twin MMGs	
<b>Movement Rate:</b>		<b>Advance</b> Up to 12" <b>Run</b> 12"–24"

• Replace Hull-mounted Twin MMGs with an Infantry Flamethrower			+10

## M8A1 GRIZZLY MEDIUM ASSAULT WALKER

The M8 was the United States' first operational walker design. Although now considered first generation, the Grizzly is a watchword in rugged and practical design. Armed with the proven 75mm dual purpose gun made famous by the Sherman tank, the Grizzly is versatile and adaptable. Its powerful arms can also clear obstacles and dismantle any enemy vehicle that strays too close. Well-liked by its crews, the Grizzly is also considered by the infantry to be a better infantry support option than a conventional tank, especially in a complex urban environment.

Unit Type: Medium Walker (2 Legs)

Standard Weapons: 1x Hull-mounted Medium Anti-tank Gun  
1x Pintle-mounted HMG  
Left and Right Arms

### REQUISITION POINTS

Regular: 225

Veteran: 270

Movement Rate: **Advance** Up to 12" **Run** 12"–24"

Damage Value: 9+

Quality: **Regular** **Veteran**

Morale Value: 9 10

### SPECIAL RULES

- **Improved HE** – Instead of HE (1"), the Medium Anti-Tank Gun has HE (2").
- **Two-legged**

## M8A4 BRUIN MEDIUM ASSAULT WALKER

While the M8A1 Grizzly was capable in most situations, it was found that sometimes heavier firepower was desired. The M8A4 Bruin support variant mounts heavy rocket racks on both arms. It retains the functional 75mm gun, but its primary role is to lay down a withering barrage of high explosives from its impressive rocket system.

Unit Type: Medium Walker (2 Legs)

Standard Weapons: 1x Hull-mounted Medium Anti-tank Gun  
1x Pintle-Mounted HMG

Forward-facing Medium Rocket System (*The Medium Rocket System is mounted across both Arms; a Bruin may not make Close Quarters attacks with its Arms*)

### REQUISITION POINTS

Regular: 275

Veteran: 330

Movement Rate: **Advance** Up to 12" **Run** 12"–24"

Damage Value: 9+

Quality: **Regular** **Veteran**

Morale Value: 9 10

### SPECIAL RULES

- **Improved HE** – Instead of HE (1"), the Medium Anti-Tank Gun has HE (2").
- **Two-legged**

## M9A2 KODIAK SUPPORT WALKER

As the US slowly understood how best to deploy regiments of Grizzly and Bruin walkers it became apparent that a dedicated anti-aircraft capability was required. Wheeled and tracked systems were unable to keep up with walkers in urban or close terrain. The Kodiak was the result, reducing its weight with the removal of the M8 series standard 75mm hull gun and adding twin HMG and a light autocannon in each arm mount. The Kodiak can deliver a veritable storm of heavy calibre rounds when defending against aircraft. Field commanders quickly learned that the Kodiaks rapid fire weaponry was also capable of decimating enemy infantry and many of these valuable units have been pulled off AA duty when a particularly stubborn enemy position needs to be cleared.

Unit Type:	Medium Walker (2 Legs)		<b>REQUISITION POINTS</b>	
Standard Weapons:	Left and Right Arms each mounting a Light Automatic Cannon and Twin HMGs ( <i>Arm-mounted HMGs do not halve their Shots value for being mounted on a Vehicle; a Kodiak may not make Close Quarters attacks with its Arms</i> )		Regular:	335

# VEHICLES

## M3A4(T) STUART LIGHT TANK

The Stuart was primarily designed for reconnaissance and infantry support, making it a useful asset on the battlefield despite its relatively light armour. Despite the increasing availability of more modern light tanks such as the M24 the Stuart remains a favourite in the recce formations. Many Stuarts were amongst the first vehicles to be up-rated with the lighter M21 Tesla cannon, and are now used in close infantry support roles in terrain not accessible to larger tanks.

Unit Type:	Light Tank	
Standard Weapons:	1x Turret-mounted M21 Light Tesla Cannon 1x Forward-facing, Hull-mounted MMG	
Movement Rate:	<i>Advance</i> Up to 9"	<i>Run</i> 9"–18"
Damage Value:	8+	
Quality:	<i>Inexperienced</i>	<i>Regular</i>
Morale Value:	8	9

### REQUISITION POINTS

Inexperienced: 104

Regular: 130

### SPECIAL RULES

- **Vulnerable** – All shots from weapons with a Pen value against the sides or rear of an M3 Stuart benefit from an additional +1 Penetration modifier.

### RIFT UNIT (ONLY IF ARMED WITH M21 LIGHT TESLA CANNON)

- Rift Dice: 1 Tesla Arc Weapon (see *Konflikt '47* rulebook, page 84)

| • Gain the Reinforced Front Armour special rule   | +20  |

## MSA2(T) STUART LIGHT TANK

The M5 Stuart is an improved version of the Stuart Light tank series, famous for its speed, reliability, and adaptability. As with the M3, the design has similarly been up-rated to carry Tesla weaponry in a specially designed turret.

Unit Type: Light Tank

Standard Weapons: 1x Turret-mounted M21 Light Tesla Cannon  
1x Forward-facing, Hull-mounted MMG

Movement Rate: *Advance* Up to 9" *Run* 9"–18"

Damage Value: 8+

Quality: *Inexperienced* *Regular* *Veteran*

Morale Value: 8 9 10

### REQUISITION POINTS

Regular: 140

Veteran: 178

### SPECIAL RULES

- **Gyro-Stabilisers** – If taken as Veteran, the M21 Light Tesla Cannon / Light Anti-tank Gun does not suffer a –1 to hit penalty for moving and shooting.

### RIFT UNIT (ONLY IF ARMED WITH M21 LIGHT TESLA CANNON)

- Rift Dice: 1 Tesla Arc Weapon (see *Konflikt '47* rulebook, page 84)

### OPTIONS

Points

- Replace Turret-mounted M21 Light Tesla Cannon with Light Anti-tank Gun & Co-axial MMG Free
- Add a Pintle-mounted MMG or a Pintle-mounted HMG +15 / +25
- Gain the Recce special rule +10
- Gain the Reinforced Front Armour special rule +20

## M4A9(T) SHERMAN MEDIUM TANK

In reaction to the appearance of the first German Walkers a growing number of Shermans had their standard turrets removed and replaced by an advanced example mounting the M17 Tesla Cannon, distinguishing the tank as the very first to be retro-fitted with Rift weaponry. Whilst not a perfect marriage of old and new, field results have been positive and the Sherman-T has remained in production.

Unit Type:	Medium Tank		
Standard Weapons:	1x Turret-mounted M17 Tesla Cannon 1x Forward-facing, Hull-mounted MMG		
Movement Rate:	<i>Advance</i> Up to 9"	<i>Run</i> 9"–18"

## M17 TESLA CANNON EMPLACEMENT

Having encountered German Panther and Schwerefeld Projektor turrets in prepared defensive lines along the Rhine and in Italy, the Allies quickly recognised the potential of these quick to install and hard to destroy defensive emplacements. Whilst US doctrine promotes fire and manoeuvre over heavy defensive positions, the ability to quickly install Rift-tech Tesla cannons with enhanced power supplies is now a feature of the Corps of Engineers designs. Combining anti-personnel and anti-tank capability into a single emplacement is also very versatile.

Unit Type:	Medium Emplacement (Counts as Medium Tank)		
Standard Weapons:	1x Turret-mounted M17 Tesla Cannon

## M8A3(T) SCOUT CAR

The M8 Greyhound is a fast, lightweight American armoured car used primarily for reconnaissance and light assault roles. Traditionally armed with a 37mm gun and a coaxial .30 calibre machine gun, providing firepower for scouting missions and skirmishes, it is now being refitted with Rift-tech weaponry such as the M21 light tesla cannon. With a 6x6 wheeled design, the M8 is highly maneuverable, and remains ideal for quick reconnaissance operations.

# TRANSPORTS & TOWS

Transports remain as relevant as ever, serving vital logistical needs and getting troops where they need to be. The introduction of heavy powered armour, and bulky genetically modified troops, however, has rendered conventional transports somewhat less effective. For now they remain in service. Engineers are hard at work coming up with fresh designs to accommodate the new age of warfare.
